

FEED SAFETY POLICY

AB LIFOSA top management, actively involved in GMP+ International GMP+ Feed safety assurance system and developing the principles of good manufacturing practices in order to produce human and livestock safe feed materials, accepts the commitment to the following GOALS:

- To meet customer requirements and expectations for improved feed safety;
- To monitor and comply continuously with the legal, quality management and GMP+ Feed Safety Assurance systems requirements for feed materials;
- To improve continuously the quality of production and the application of GMP principles within the company in order to remain a competitive producer of feed materials in the global market;
- To carry out continuous quality control by periodic Hazard Analysis at Critical Control Points (HACCP) in order to avoid adverse effects throughout the food chain.

The top management of AB Lifosa GUARANTEES:

- The Company has an integrated and functioning quality control and feed safety assurance system, based on the requirements of the quality management system and HACCP principles, and has developed related operational management documents, the implementation of which is tailored to the activities carried out and enables compliance with the defined actions in certain processes.
- A management representative has been appointed in the company to be responsible for the effective operation, maintenance, improvement, implementation of changes, management information and communication of the GMP+ Feed Safety Assurance System within the company.
- The Company's employees, on whom feed safety and its efficiency depend, are introduced to and integrated into the GMP+ Feed System processes, are continuously trained and qualified. Their responsibilities are identified and defined.
