

AKCINĖ BENDROVĖ „LIFOSA“

FEED SAFETY POLICY

AB „LIFOSA“ top management, actively involved in GMP+ Feed safety assurance system FSA 2020 and developing the principles of good manufacturing practices in order to produce quality and livestock safe feed materials, is committed to the following **GOALS**:

- *Comply continuously with the legal and other requirements for feed materials as well as the requirements of the company prepared documents for quality management and GMP+ FSA system;*
- *Meet customer requirements and expectations regarding feed safety;*
- *Ensure product quality and improve the application of GMP principles within the company in order to remain a competitive producer of feed materials in the global market;*
- *Conduct continuous quality control by periodic Hazard Analysis at Critical Control Points (HACCP) in order to prevent adverse effects throughout the food chain.*

The top management of AB „Lifosa“ **GUARANTEES**:

- The Company has an integrated and functioning quality control and FSA system in place that is consistent with the company's context and continuously monitored, audited and quantitatively assessed objectives based on the requirements of the quality management system and HACCP principles. The Company has developed operational management documents related to other management systems, the implementation of which is tailored to the activities carried out and enables compliance with the defined actions in certain processes.
- A management representative has been appointed in the company to be responsible for the effective operation, supervision, improvement, implementation of changes, management information and internal and external communication of the GMP+ FSA system.
- Company employees whose activities affect feed quality and safety are familiar with the GMP+ FSA system, involved in its processes, and continuously informed about updates. They have the necessary competence and qualifications, which are ensured through selection, initial and periodic training. The responsibilities and duties of employees are clearly defined in internal documents, thus ensuring the transparent and effective operation of the feed safety system in the company.
